

Now, I know there are still a few who insist that climate change is one big hoax, even a political conspiracy. My friends, these people are so out of touch with science that they believe rising sea levels don't matter, because, in their view, the extra water is just going to spill out over the sides of a flat Earth.

John Kerry, It Is Not Enough: Despite Promise of New Aid, U.S.

Urged to Take Responsibility for Climate Crisis, December 9, 2015, Paris
